Superior Barcode Labels for Textiles

Solutions for 'Difficult To Track' Items

**Do you have items that are difficult to track through your inventory system?**

Belts                      Props                      Furniture                      Handbags                      Hats  
Costume Heads              Rental Shoes              Retail Items              Lighting              Luggage

**IPC-Tags offers two solutions:**

- 1) Easy Peel & Stick Labels in a variety of sizes to help you track non-textile items.
- 2) For textile items to which barcodes cannot be applied directly, we offer fabric label solutions that can be sewn into garments like manufacturers' or wash-care tags.

**Jewelry items** can easily be tracked by taking a photograph of the item and placing it in a plastic bag with the jewelry. A peel & stick barcode label can then be placed on the outside of the bag for easy tracking.

For **fragile fabrics** that cannot be placed on a heat seal machine, a label can be applied to a sturdier fabric and then sewn into the item to be tracked. This example shows barcode labels applied to a variety of fabric labels that can be sewn in next to or under manufacturers' tags or hidden in shoulder seams.

**Shoes and handbags** can be easily tracked using peel & stick labels. Labels should be placed in the arch area of the shoe when possible. Other locations might include shoe straps or under the tongue of the shoe. Some handbags may have linings that can be separated while a barcode label is heat sealed to it. The peel & stick label can also be used.

**Belts** are another accessory item that can be easily tracked using our label. Our peel & stick barcode labels may be placed near the belt buckle, or for fabric belts, our standard barcode can be heat sealed onto the fabric.

**Remember, to reduce scanning time in and out of your facility, be consistent in the placement of the label within item groups.**
